An Invitation to Support Voices

Dear Voices Friends,

It's not 1945 when two atomic bombs were dropped on Japan.

It's not 1985 when Ronald Reagan and Mikhail Gorbachev met in Reykjavik, Iceland and where they started the conversations that eventually led to the steep reduction of nuclear weapons.

It's 2026 when AI tools related to nuclear weapons could be hacked, and access to the weapons' technical and control systems could be compromised. Our response to these threats of catastrophe or annihilation? The President of the United States and five leading tech leaders have committed to "tremendous self-regulation!"

This is an inflection moment in world history regarding our planet Earth and its life.

What's a person to do when doing something is called for? Voices offers an opportunity to join a chorus of hopeful alarmists who unite, pray, give, and raise one voice to shout that life, in its entirety, needs to come first.

During this past year, Voices has offered these soul-supporting activities:

- Four-days of "**Nuclear Prayer Day - Global Days of Prayer and Action**" engaged prayer leaders in local and global activities to recognize the devastation of 1945 and plan for a future world free of nuclear weapons.
- The seventh **annual Gorbachev-Shultz Youth Award** was granted to Joel Naoki Christoph, economist and youth communicator for a World without Nuclear Weapons.
- Strategic Initiative partners have already begun discussions on collaborating for 2027 Nuclear Prayer Day.
- Voices is also sending several people to the review conference for the Treaty on the Prohibition of Nuclear Weapons at the UN this December.

The Voices Cooperation Circle is developing into an independent entity with your help. Please join us in supporting this vital initiative for peace without nuclear weapons.

The Rt. Rev. William E. Swing

Paul Andrews, President
